

GREAT NORTHERN TRAIL

MASTER PLAN STUDY

Project Information

The purpose of the Great Northern Trail Master Plan is to define a preferred alignment for the 30-mile Great Northern Trail corridor that extends from Elk River to Milaca. The southmost 9 miles of the trail are paved from Elk River to Zimmerman, as well as a 2 mile segment through the City of Princeton.

Your valuable input was used to refine alternate routes for extending the GNT! Partners and stakeholders have used your feedback to develop trailhead concept plans. Your input is more valuable than ever as we refine trail amenities and trailhead designs.

See reverse side for upcoming event.
