

Sherburne County will be tree clearing on County State Aid Highway (CSAH) 11 from CSAH 16 to the north county line.

The preparation for an upcoming project and the continued maintenance of this road will require the existing trees be removed from within the County Right of Way. Branches on trees not within the right-of-way that overhang the right-of-way will also be trimmed. The county will locate the right of way line by placing lath before any tree clearing begins. This will provide an opportunity for you to see where the county right of way is located.

Our County Maintenance crews will generally perform this work during the winter months as time permits and could possibly begin soon. All the cut trees will be removed from the area. If you have any questions or concerns please contact me. Patti Kukowski, Right of Way Agent 763-765-3358
